Make Payments, Current Balance and Participation Reports

-- **Make Payments:** This feature will allow you to make a credit card payment to fund your student's lunch account. You can make a one time payment or schedule a payment.

Scheduling a payment is an easy way to make sure that your student always has money in their lunch account. (You can also access this option by clicking the link "Edit Scheduled Payments").

-- **Current Balance:** This feature is updated daily and will allow you to view the most current balance in your student's lunch account.

-- **Participation Report:** This feature will access information from the school's cafeteria to return a report containing descriptions of what your student has been purchasing each day. You will not only see a description, but also the quantity of items purchased and the cost of each item. Parents particular like this feature, so that they can monitor any "unhealthy" spending of their hard earned money.

This report can be run each day, for 7 days, 30 days or for the previous month.

Café Prepay has been processing payments for over 10 years. Parents and schools have helped us over the years to make the website simple, safe and easy for parents to use.
