

COVID-19 Protocols

In an effort to maintain a safe, healthy, and vibrant community, Middlesex has required that all eligible members of its community be fully vaccinated and to test weekly. Additionally, all members of this community have committed to various health protocols in an effort to keep the campus and classrooms open.

We welcome you as guests to our beautiful campus, but we must ask that you follow some important COVID-19 protocols. We thank you in advance for your cooperation and adherence to the following:

All visitors, including parents, should be fully vaccinated before coming to campus. While the School will not be asking for proof of vaccination, we ask that any unvaccinated family members remain off campus.

It is imperative that all visitors to campus are without [COVID-19 symptoms](#), have not been directed to quarantine, and have not knowingly been exposed to an individual with COVID-19.

While on campus, properly fitting masks must be worn at all times while indoors, except in instances where a person is seated to eat or drink.

No visitors, including parents, are allowed in any of the dormitories.

If you are a guest of Family Weekend and you become symptomatic during your visit to campus, please leave immediately and contact your student's advisor.

If you are a guest of Family Weekend and you become symptomatic directly following Family Weekend, please contact the [Campus Health Center](#).

Due to the unpredictable nature of COVID-19 infection rates, these protocols may change at any time.
